

INTRODUCTORY FLIGHTS

This is the best opportunity for your own attempt to take over the controls of the helicopter!

Of course, under the guidance of an experienced instructor...

You think about training, but have never been in a helicopter? Don't you know if you are able to "absorb" all the necessary knowledge on the flight course, you desire to feel helicopter flight controls on your own or don't know your well-being during the helicopter flight? You are welcome for an introductory flight!

Minimum familiarization flight time is 30 minutes.

The cost of such a flight in an R 44 helicopter is about EUR 420.

The flight can also be booked in the form of an additional paid voucher.

During the flight familiarization you will learn the basic and necessary theoretical knowledge and the basic principles of helicopter flight. You will try your skills as a pilot without a medical examination, without any formalities. You can seat as a passenger as well.

To participate in the introductory flight should arrange an appointment by contacting us by telephone or by completing the contact form. Term and place of the introductory flight or full training is determined individually. Available dates are subject to weather conditions and availability of helicopters.
